Simple, but efficient : With this enclosure you take full advantage of the small form factor of Thin-ITX Half-Height mainboards. And with its dimensions of only 200x185x46 mm it has, with an internal volume of only 1.6 liters, room for one 2.5" harddrive or SSD drive. The enclosure can be operated fully fanless for example with the Intel DN2800MT or Mitac PD10BI/PD10RI even under full load in continous operation.

Technical data :
Drives : 1x 2.5"
Front-connectors : 1x USB 2.0
Rear-connectors : 2x hole for SMA antennas
Front-buttons : Power
Front-LED : Power, HDD
Dimensions : 200 x 185 x 46 mm
Weight : 1kg
